REPairs
If you find the unit in need of repair, contact your cable system operator for repair or replacement.

NOTE TO CATV SYSTEM INSTALLER
This reminder is provided to call the CATV system installer’s attention to Article 820-40 of the NEC that provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close as possible to the point of cable entry as practical.

EXAMPLE OF ANTENNA GROUNDING

WARNING
TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point, within an equilateral triangle, is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

This installation should be made by a qualified service person and should conform to all local codes.
Important Safety Instructions

1 Read instructions
All the safety and operating instructions should be read before the appliance is operated.

2 Retain instructions
The safety and operating instructions should be retained for future reference.

3 Heed warnings
All warnings on the appliance and in the operating instructions should be adhered to.

4 Follow instructions
All operating and use instructions should be followed.

5 Cleaning
Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.

6 Attachments
Do not use attachments not recommended as they may cause hazard.

7 Water and moisture
Do not use this equipment near water; for example, near a bath tub, wash bowl, kitchen sink, or laundry tub, in a wet basement, or near a swimming pool, and the like.

8 Accessories
Do not place this product on an unstable cart, stand, tripod, bracket, or table. The product may fall causing serious injury and serious damage to the appliance. Use only with a cart, stand, tripod, bracket, or table recommended by the manufacturer, or sold with the equipment. Any mounting of the appliance should follow the manufacturer’s instructions, and should use a mounting accessory recommended by the manufacturer.

9 Ventilation
Slots and openings in the cabinet are provided for ventilation and to ensure reliable operation of the equipment and to protect it from overheating. The openings should never be blocked by placing the product on a bed, sofa, rug, or similar surface. Equipment should never be placed near or over a radiator or heat register, or in a built-in installation such as a bookcase or rack unless proper ventilation is provided.

10 Power sources
This product should be operated only from the type of power sources indicated on the marking label. If you are not sure of the type of power supplied to your home, consult your local power company. For equipment intended to operate from battery power, or other sources, refer to the operating instructions.

11 Ground or polarization
This equipment may be equipped with a polarized alternating-current line plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug.

12 Alternate warnings
This equipment may be equipped with a 3-wire grounding-type plug, a plug having a third (grounding) pin. This pin will only fit into a grounding-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the grounding-type plug.

13 Power cord protection
Power supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the appliance.

14 Outdoor Antenna Grounding
If an outside antenna or cable system is connected to the equipment, be sure the antenna or cable system is grounded so as to provide some protection against voltage surges and built-up static charges.
15 Lightning
For added protection for this equipment during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the video product due to lightning and power line surges.

16 Power lines
An outside antenna system should not be located in the vicinity of overhead power lines or where it can fall into such power lines or circuits. When installing an outside antenna system, extreme care should be taken to keep from touching such power lines or circuits, as contact with them may be fatal.

17 Overloading
Do not overload wall outlets and extension cords as this can result in a risk of fire or electrical shock.

18 Object and liquid entry
Never push objects of any kind into this equipment through openings as they may touch dangerous voltage points or short-out parts that could result in a fire or electrical shock. Never spill liquid of any kind on the product.

19 Servicing
Do not attempt to service this equipment yourself as opening or removing covers may expose you to dangerous voltage or other hazards, refer all servicing to qualified service personnel.

20 Damage requiring service
Unplug this equipment from the wall outlet and refer servicing to qualified service personnel under the following conditions:
  a. When the power supply cord or plug is damaged.
  b. If the equipment has been exposed to rain or water.
  c. If liquid has been spilled, or objects have fallen into the equipment.
  d. If the equipment does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the equipment to its normal operation.
  e. If the equipment has been dropped or cabinet has been damaged.
  f. When the equipment exhibits a distinct change in performance, indicating a need for service.

21 Replacement parts
When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards.

22 Safety check
Upon completion of any service or repairs to this video product, ask the service technician to perform safety checks to determine that the product is in proper operational condition.

23 Heat
The product should be situated away from heat sources such as radiators, heat registers, stoves, or other products (including amplifiers) that produce heat.

24 Battery usage
Notwithstanding any information provided by Motorola in this manual regarding the use of batteries, the end user assumes all responsibility and liability to use and dispose of batteries in accordance with all applicable laws, rules and regulations. Motorola will not be liable to anyone for the end user's failure to use and/or dispose of batteries in the proper manner and in accordance with such laws, rules and regulations, or for any defect contained in batteries that may cause injury damage to persons or property.
Regulatory Information

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Federal Communications Commission Radio and Television Interface Statement for a Class 'B' Device

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in the residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If the equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Increase the separation between the equipment and the affected receiver
- Connect the equipment on a circuit different from the one the receiver is on
- Ensure that the cover plate for the security card is secured and tight

Changes or modification not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

Declaration of Conformity

According to 47 CFR, Parts 2 and 15 for Class B Personal Computers and Peripherals; and/or CPU Boards and Power Supplies used with Class B Personal Computers, Motorola, Inc., 6450 Sequence Drive, San Diego, CA 92121, 1-800-225-9446, declares under sole responsibility that the product identifies with 47 CFR Part 2 and 15 of the FCC Rules as a Class B digital device. Each product marketed is identical to the representative unit tested and founded to be compliant with the standards. Records maintained continue to reflect the equipment being produced can be expected to be within the variation accepted, due to quantity production and testing on a statistical basis as required by 47 CFR 2.909. Operation is subject to the following condition: This device must accept any interference received, including interference that may cause undesired operation. The above named party is responsible for ensuring that the equipment complies with the standards of 47 CFR, Paragraphs 15.107 to 15.109.

Canadian Compliance

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations. Cet appareil numérique de la classe B respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.
FOR HOME OR OFFICE USE

Tested To Comply With FCC Standards

NOTICE
THEFT OF SERVICE IS A CRIME. INSTALLING THIS DEVICE WITHOUT PERMISSION OR UNAUTHORIZED TAMPERING, MODIFYING OR ALTERING IT IN ANY WAY MAY SUBJECT YOU TO CIVIL OR CRIMINAL PENALTIES. CHECK WITH YOUR LOCAL CABLE COMPANY.

INTRODUCTION

The DCT700:

- Supports an on screen menu that provides Settings, Full Channel Block, Parental Controls, and Help
- Provides a basic user interface that shows channel number and a clock
- Provides a simple Help application with guidance and information on how to order more services and contact the Verizon Support Center

The DCT700 requires a remote control to operate.

Congratulations on receiving the DCT700 Digital Adapter. It’s simple to set up and easy to operate.

This guide introduces you to the features and operation of the DCT700. Access to the DCT700 features is gained through the remote control.

To get the most out of your DCT700, be sure to read this instruction manual and the supplied remote control User Guide.

To order PPV events, see instructions in your Verizon FiOS Welcome Kit.
INTRODUCTION

Front Panel

The DCT700 is controlled by your remote control (provided separately). The front panel has an LED display to indicate the unit is turned on.
INTRODUCTION

Rear Panel

Before you begin installing the DCT700, take a moment to become familiar with the rear panel connections. The rear panel includes connectors for system cabling and a power cord to connect the DCT700 to an electrical power outlet. For cabling diagrams, see “Connecting Your DCT700”.

Use the remote control to operate the DCT700, TV, and VCR.

Your remote control may differ from the one illustrated here.

For information on operating and programming your remote control, refer to the remote control User Guide supplied by Verizon.

The table following this drawing describes the functions of the remote control. Some of the features described in the table may not be available. Check with Verizon to determine which features are being offered in your area.

**Turning Power On and Off**

To turn the DCT700 on or off, be sure it is in cable mode by pressing **CABLE** on your remote control and then press **POWER**.

**Changing Channels**

Be sure the remote control is in cable mode and enter the number of the channel you want to tune using the numeric keys, or press **CHANNEL +** or **–** on the remote control to step through the channel selection.

---

**NOTE**

The DCT700 requires a remote control to operate.
Before you begin to hook up your DCT700, review the following:

- For basic cable connections, use 75-ohm coaxial cables equipped with F-type connectors. You can find coaxial cables in your local electronics store.

- For audio or video outputs, use cables equipped with RCA-type connectors.

- Disconnect power from the DCT700 before connecting or changing cable connections.

- **Do not** place anything on top of the DCT700, especially other home video components.

**NOTE**

*It is important to remember not to place anything on top of the DCT700 and to provide for adequate ventilation to prevent overheating.*
Standard TV Cabling

Use 75-ohm coaxial cables to connect your DCT700 to a TV. This is the most common cable connection, and it provides all of the basic features of the DCT700.

If you are connecting the coaxial TO TV/VCR connector on the DCT700 to the coaxial CABLE IN connector on the TV, you must tune your TV to channel 3 or 4.

The illustrated connections will not provide stereo. Connect the DCT700 using RCA baseband connectors to receive stereo (illustrated later in this section).
Standard VCR Cabling

To connect your VCR, you will need 75-ohm coaxial cables. The illustrated VCR connection enables you to record the program you are watching, including Pay-Per-View events. You can also view videotapes just as you do now.

The illustrated connections will not provide stereo. Connect the DCT700 using RCA baseband connectors to receive stereo (illustrated later in this section).
In these illustrations the baseband connectors on entertainment components are labeled R for right audio, L for left audio, and V or VIDEO.

**Composite Baseband**

Connecting the DCT700 using the RCA-type baseband outputs enables you to experience stereo and Dolby Surround® sound when available.
Composite VCR Cabling

This diagram illustrates how to connect the DCT700 to a VCR using the audio connectors on the VCR.
Stereo Cabling Diagram (VCR to Stereo)

This diagram illustrates how to connect the DCT700 to a stereo using the audio connectors on the VCR. The VCR sound is played through the stereo.
Stereo Cabling Diagram (TV to Stereo)

This configuration provides for the TV sound to play through the stereo.
Before calling your service provider, review the troubleshooting guide. This information is to help you quickly solve a problem. If your problem still exists, contact your service provider.
